**ID#:** 88-02 Water Main Replacement Capacity

---

The following information is in response to questions posed at our department's hearing on November 3, 2017 to discuss the proposed 2018 budget.

Alderman Hopkins asked for the percentage of water main replacement which require an increase in diameter/capacity.

Between 2012 and 2017, approximately 52% of the water mains replaced under DWM's Capital/Improvement Program were replaced with a new main of larger diameter than the previous main.

As always, please let me know if you have any further questions.

**Re:** Request for Information from Annual Appropriation Committee Hearing

**ID#:** 88-03 Status of 2200 N. Bosworth

---

The following information is in response to questions posed at our department's hearing on November 3, 2017 to discuss the proposed 2018 budget.

Alderman Hopkins asked for the status of 2200 N. Bosworth Ave.

The existing 8" cast iron water main in N Bosworth Avenue between W Fullerton Avenue and N Clybourn Avenue was installed in 1907. DWM evaluated the possible rehabilitation of this water main using trenchless technology such as Cured-In-Place Pipe (CIPP) and it was determined that this water main is not a candidate for rehabilitation because it does not meet current Illinois regulations for separation from the sewer.

Title 35, Subtitle F, Chapter II of the Illinois Administrative Code, Parts 651-654 requires a minimum horizontal separation of 10 feet between the edge of the water main and the edge of the sewer main unless the water main invert is at least 18 inches above the crown of the sewer. The horizontal separation between the existing water and sewer mains in N Bosworth Avenue between W Fullerton Avenue and N Clybourn Avenue is less than 10' and there is not adequate vertical separation because the sewer is less than 6.5' below ground surface. In this case, Illinois regulations would require replacement of the existing sewer in addition to rehabilitation of the water main.

Therefore, the design for this project is to replace approximately 570' of existing water main with new 8" Ductile Iron water main located at least 10' away from the existing sewer. The design plans are currently being finalized and construction is currently planned to start in Spring 2018.

As always, please let me know if you have any further questions.

---

The following information is in response to questions posed at our department's hearing on November 3, 2017 to discuss the proposed 2018 budget.

Alderman Dowell asked for the African American spend for MBE/WBE contracts.

The MBE/WBE African American spend from 8/2016-8/2017 is \$18,035,213.

As always, please let me know if you have any further questions.

The following information is in response to questions posed at our department's hearing on November 3, 2017 to discuss the proposed 2018 budget.

Alderman Thompson asked for the percentage of contractors utilized by the department that are located in Chicago.

Attached is a spreadsheet outlining the contractors located in Chicago.

As always, please let me know if you have any further questions.

**ID#:** 88-10 General Budget Questions

---

The following information is in response to questions posed at our department's hearing on November 3, 2017 to discuss the proposed 2018 budget.

Alderman Reilly asked for the following general budget information:

Number of Vacancies in 2018 – 318

Number of non-union raises for 2018 – 0

How much is saved in non-personnel cost due to Zero-based Budgeting:

The Department of Water Management has always practiced zero based budgeting each budget season. Bureau heads itemize each account starting at zero and justify all services and commodities that will be needed for the next fiscal year. Attached is a spreadsheet outlining cost savings for 2018 due to zero-based budgeting.

As always, please let me know if you have any further questions.
